Documentation

Get started with Angular, learn the fundamentals and explore advanced topics on our documentation website.

- Getting Started
- Architecture
- Components and Templates
- Forms
- API

Advanced

- Angular Elements
- Server Side Rendering
- Schematics
- Lazy Loading
- Animations

Development Setup

Prerequisites

- Install Node.js which includes Node Package Manager

Setting Up a Project

Install the Angular CLI globally:

```
npm install -g @angular/cli
```

Create workspace:

```
ng new [PROJECT NAME]
```

Run the application:

```
cd [PROJECT NAME]
ng serve
```

Angular is cross-platform, fast, scalable, has incredible tooling, and is loved by millions.

Quickstart

Get started in 5 minutes.

Ecosystem

- Angular Command Line (CLI)
- Angular Material

Changelog
