Documentation

Get started with Angular, learn the fundamentals and explore advanced topics on our documentation website.

- Getting Started
- Architecture
- Components and Templates
- Forms
- API

Advanced

- Angular Elements
- Server Side Rendering
- Schematics
- <u>Lazy Loading</u>
- Animations

Development Setup

Prerequisites

• Install Node.js which includes Node Package Manager

Setting Up a Project

Install the Angular CLI globally:

npm install -g @angular/cli

Create workspace:

ng new [PROJECT NAME]

Run the application:

```
cd [PROJECT NAME]
ng serve
```

Angular is cross-platform, fast, scalable, has incredible tooling, and is loved by millions.

Quickstart

Get started in 5 minutes.

Ecosystem

- Angular Command Line (CLI)
- Angular Material

Changelog

Learn about the latest improvements.

Upgrading

Check out our <u>upgrade guide</u> to find out the best way to upgrade your project.

Contributing

Contributing Guidelines

Read through our $\underline{\text{contributing guidelines}}$ to learn about our submission process, coding rules, and more.

Want to Help?

Want to report a bug, contribute some code, or improve the documentation? Excellent! Read up on our guidelines for <u>contributing</u> and then check out one of our issues labeled as <u>help wanted</u> or <u>good</u> <u>first issue</u>.

Code of Conduct

Help us keep Angular open and inclusive. Please read and follow our Code of Conduct.
